Outlook to 2021

Working paper on compulsory EU ATSEP License in the EU Aviation Strategy

Like the existing single European ATCO license, SATTA supports this initiatives for an analogous uniform European license for ATSEP.

Safety is well known to be the number one priority in air traffic, and given the current threats such as terrorism, it should be in the interest of all states to know which experts work on safety-critical infrastructures.

This can only be guaranteed by a personal licensing.

Only an ATSEP license systematically demonstrates competence, ability and qualification!

Please tell us what your role as ATSEP should be and should be improved; we are your direct line to the decision-makers!
